Community Fund Application Guidance

Who can apply for funding?

The Community Fund supports requests for donations from members, either for organisations that members support themselves, or for fundraising activities being carried out by members. Donations will be targeted at issues addressing our social mission and supporting members in the causes they are concerned about.

What will you fund?

We're happy to consider requests for a broad range of causes, but please note that the Community Fund will not make donations to political organisations.

What makes a good application?

We're keen to understand the impact that our support will have, so we would ask you to mention this within your application. Tell us what difference the donation will make.

How do I apply?

All you need to do is fill in our simple application form here - [Community Fund Application Form](#)

How much can I apply for?

We don't have any set limits on the amounts we can donate. We expect most donations to be between £250 and £1,000, but we're able to consider higher value requests. If we're not able to support your cause with the full amount, we may offer you a smaller donation.

If my application is successful, how will you make payment?

Normally, payment will be made directly to an organisation, or through a donation website, and not directly to the member.

How long will it take get a decision?

The committee considers applications no less than bi-monthly, so we expect you should not have to wait more than two months for a decision.

What do you need from me once the donation has been made?

We don't have any ongoing monitoring requirements. However, we'd love you to share with us any photographs you have that help us to demonstrate the impact that our donation has had.
